Mea Culpa

What I wrote:

Let $L = \{ww \mid w = w^R\}$ and consider the distinguishing set $S = \{0^n \mid n \geq 0\}$. For $x = 0^n$ and $y = 0^m, m \neq n$, which of the following is a distinguishing extension for x and y ?

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

- a) $z = 0^n$
- b) $z = 1^n$
- c) $z = 10^n$
- d) $z = 01^n$

Mea Culpa

What I meant to write:

Let $L = \{w \mid w = w^R\}$ and consider the distinguishing set $S = \{0^n \mid n \geq 0\}$. For $x = 0^n$ and $y = 0^m$, $m \neq n$, which of the following is a distinguishing extension for x and y ?

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

- a) $z = 0^n$
- b) $z = 1^n$
- c) $z = 10^n$
- d) $z = 01^n$

Reusing a Proof

Finding a distinguishing set can take some work...

Let's try to reuse that work!

Assignment Project Exam Help

How might we show <https://eduassistpro.github.io/>

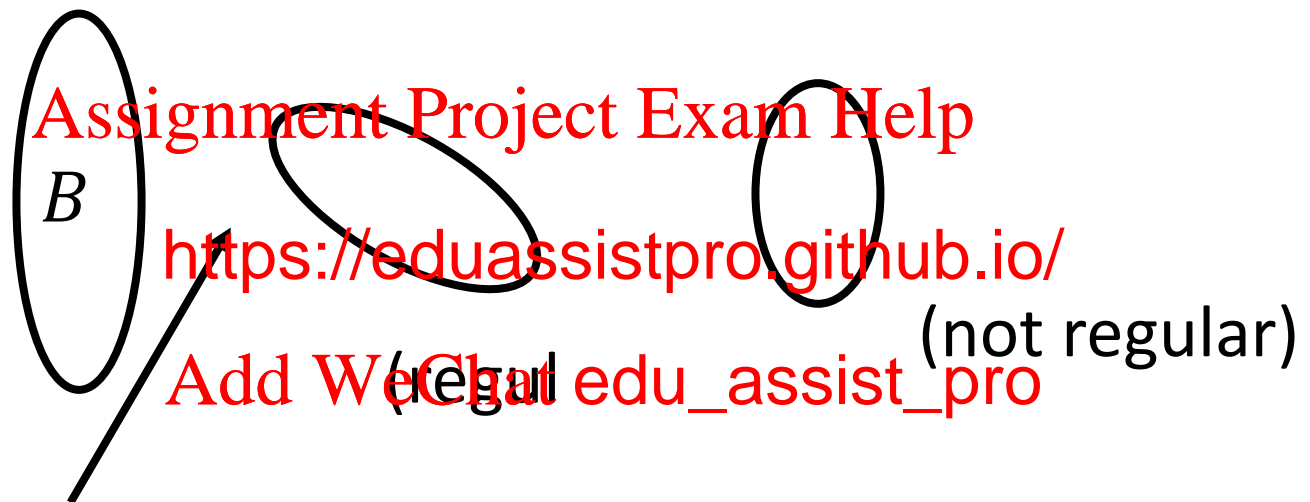

$BALANCED = \{w \mid w \text{ has an equal number of 0s and 1s}\}$
is not regular?

Add WeChat edu_assist_pro

$$\{0^n 1^n \mid n \geq 0\} = BALANCED \cap \{w \mid \text{all 0s in } w \text{ appear before all 1s}\}$$

Using Closure Properties

If A is not regular, we can show a related language B is not regular

any of $\{\circ, \cup, \cap\}$ or, for one language, $\{\neg, ^R, *\}$

By contradiction: If B is regular, then $B \cap C (= A)$ is regular.

But A is not regular so neither is B !

Example

Prove $B = \{0^i 1^j \mid i \neq j\}$ is not regular using

- nonregular language

$$A = \{0^n 1^n \mid n \geq 0\} \text{ and}$$

- regular lang

$$C = \{w \mid \text{before } 1s\}$$

<https://eduassistpro.github.io/>
Add WeChat edu_assist_pro

Which of the following expresses A in terms of B and C ?

a) $A = B \cap C$

c) $A = B \cup C$

b) $A = \bar{B} \cap C$

d) $A = \bar{B} \cup C$

Assignment Project Exam Help

<https://eduassistpro.github.io/>

Add WeChat edu_assist_pro

!DANGER!

Let $B = \{0^i 1^j \mid i \neq j\}$ and write $B = A \cup C$ where

- nonregular language

$$A = \{0^i 1^j \mid i > j \geq 0\} \text{ and}$$

- nonregular language

$$C = \{0^i 1^j \mid i < j\}$$

Does this let us conclude B is nonregular?

Sets, Strings, Languages (0)

- Know the definition of a string and of a language (and the difference between them)
- Understand operations on strings: Concatenation, reverse
- Understand operations on sets: Union, intersection, complement
- Know the difference between

Deterministic FAs (1.1)

- Given an English or formal description of a language L , draw the state diagram of a DFA recognizing L (and vice versa)
- Know the formal definition of a DFA (A DFA is a 5 tuple...) and construct a state diagram and formal description
<https://eduassistpro.github.io/>
- Know the formal definition of a NFA (A NFA computes)
- Construction for closure of regular languages under complement

Nondeterministic FAs (1.2)

- Given an English or formal description of a language L , draw the state diagram of an NFA recognizing L (and vice versa)
- Know the formal definition of an NFA
- Know the power of converting an NFA to a DFA
- Proving closure properties: union, concatenation, star
- Know how to prove your own closure properties

Add WeChat edu_assist_pro

Regular Expressions (1.3)

- Given an English or formal description of a language L , construct a regex generating L (and vice versa)
- Formal definition of a regex
- Know how to convert a regex to an NFA
- Know how to convert an NFA to a regex

Non-regular Languages (Myhill-Nerode Note)

- Understand the statements of the distinguishing set method for proving DFA size lower bounds / non-regularity
- Understand the proof of why the distinguishing set method works, <https://eduassistpro.github.io/> prove similar statements
- Know how to apply the method to specific languages
- Know how to show languages are non-regular by combining distinguishing set method with closure properties

Test tips

- You may cite without proof any result...
 - Stated in lecture
 - Stated and proved in the main body of the text (Ch. 0-1.4)
 - These include worked-out examples of state diagrams, regexes
 - **Not included** are problems, (solve) assignments, discussion problems, (solve) problems in the text
